Consent form for the Bangladesh Environment and Migration Survey (BEMS)

I am _____. I am from a Private Research Organization of Bangladesh named Mitra and Associates. The Head office of Mitra and Associates is in Iqbal Road, Mohammadpur, Dhaka. Usually, we conduct various types of survey to assist the social development agenda of the country. Recently, we are conducting a research about the effects of environmental conditions. As part of the research, we are talking to selected households. Your participation will improve the quality of our research. We hope that our research findings will lead to actions that may improve some of the environmental conditions in this area, but we have to tell you that your involvement will not gain any benefits for you or your community at this point, nor will it cause you or the community any harm.

Let me tell you a little more about the study.

We are trying to understand the relationship between the environmental conditions that people in households face and their responses to these conditions. We know that different environmental factors are considered important in different places; we would like to know what environmental factors are important in your household and village, how these conditions affect livelihoods and other aspects of household well-being, including and the chances of leaving the village. As part of the research, we will be survey approximately 200 people in this village.

The interview will take approximately 60 minutes. Your participation in this research is voluntary and you can stop the interview at any time. Your participation is really important for this research.

The information you give us will only be used for our research. Everything you tell us will be kept confidential. We will be taking personal information from you but it will be separated from the other responses to the survey, and then kept encoded. This means no personal identification can be in the data set and in the analysis of results. But your participation in the study may be known to other people in the community because they may see an interviewer approach your household. Are you willing to participate in the research?

If you have any questions about this research project now or anytime into the future, you may contact us at these numbers Mr. S. Fuad Pasha, Mobile: 01711-278-664. Here is our contact information to keep for your reference.

Do you like to ask anything about our survey?
